

The Casco Bay Plan

Restoration Plan Database: Crystal Reports of Individual Plan Summaries

I. BASIC PLAN DATA

Plan name:

The Casco Bay Plan

Brief description of plan:

This plan focuses on five key issues of importance to the health of the bay and proposes actions to protect the bay.

Region the plan is located within:

North Atlantic Region

Watershed(s) included within the plan:

N100x

Area plan covers (in square miles):

985.00 square miles

Plan scale:

County

Plan's lead organization(s):

Casco Bay Estuary Project

Plan's Main Contact Information:

No Information Provided

On-line version of plan:

Date of original plan:

1996

II. TECHNICAL INFORMATION

Plan includes restoration goals: Y

Level of detail of the goals:

G

Summary of the goals:

To minimize adverse environmental impacts to ecological communities from the use and development of land and marine resources.

Plan recommends restoration of specific project sites:

N

Plan includes a discussion of funding sources:

Y

Plan addresses long-term protection of restored sites:

Y

Partners included in developing the plan:

Federal
State
Local
Business/Industry
Non-profit Organizations
Private landowners

Type(s) of public outreach included during plan development:

Held public workshops, meetings, open house, or scoping meetings
Formed an advisory group(s)
Involved the media through news releases, public service announcements, etc.

Plan includes public outreach as part of plan implementation (e.g. annual public meeting, local group participation):

Y

Plan discusses the application of innovative approaches to restoration:

N

Plan make use of GIS mapping capabilities:

N

Plan addresses monitoring/reference sites for ecosystem level monitoring (baseline conditions) by:

G

Plan addresses monitoring/reference sites for project level monitoring by:

G

The plan discusses or coordinates with other restoration plans covering the same geographic area:

N

Other plan names:

Plan contains detailed information on historic and/or current habitat size, rate of loss, acres restored or protected, etc.):

Y

Summary of this habitat information:

In 1994, USFWS documented 228 acres of vegetated wetlands lost between the 1970's and the 1980's. This loss does not include further losses in the 1980's or losses of linear fringe wetlands that surround narrow streams.
